

Project Profile

Sandwell General Hospital

Introduction

Sandwell General Hospital is a busy 'acute' hospital providing many specialist services and a full range of emergency services to the local community. The hospital innovations and improvements included upgrading the existing pharmaceutical Cleanroom. A state of art turnkey design was installed to meet all requirements ensuring that the facility would meet the 2010 program and take them well into the 21st century.

Data

Time on Site:	10 weeks
Physical Size:	72m ³

Client Comments

'Excellent! Sandwell pharmacy staff appreciate all the hard work and great facility we have been left to work in.'

Scope of Work

CDC Cleanroom Specialists were employed as principal contractor and designer for modifications to an existing facility which had suffered severe water damage due to flooding:

- Partitioning
- Ceiling and vinyl floor
- Strip-out and builder's work
- Air conditioning plant modification
- Automatic controls
- Electrical and lighting
- Mechanical pipework and ductwork
- Commissioning and Validation
- Cleandown
